

## CHILLIWACK BUSINESS ESTATES Chilliwack, BC

### engineering, planning & environmental services

Chilliwack Business Estates is intended to be a planned, mixed use facility that embraces all manner and size of business operation, including commercial, industrial, professional and offices.

As civil consultants for this project, Wedler Engineering LLP provided Chilliwack Economic Partners Corporation (CEPC) with all civil engineering, planning and environmental services surrounding the project.

A key aspect to Chilliwack Business Estates was the ability to entice Stream International to set up their call centre operations in Chilliwack. Stream was courted by many municipalities and had specific criteria in mind for choosing a site. Wedler worked closely with CEPC to provide conceptual plans detailing the required specifics. Ultimately, Stream chose the Chilliwack site, effectively drawing millions of dollars of revenue into the community.
