

LEGACY PACIFIC INDUSTRIAL PARK Chilliwack, BC

industrial redevelopment project

Legacy Pacific Industrial Park is an ongoing redevelopment of a 3.6ha food processing plant into a light industrial business park. Wedler Engineering LLP has worked closely with Legacy Pacific Land Corporation to provide evaluation of conditions and functionality of existing utilities and the upgrading and improvements of on-site and off-site services.

A 7m-deep sewage pump station, as well as 1.2km of sanitary sewer forcemain have been installed to accommodate the site. This project also required a partial creek enclosure and various environmental works.
